

Lista de Aplicacion de Correas para Vehiculos Coreanos

Correas sin cobertura con bordes cortados

Correas sin cobertura con bordes cortados y dentadas

- Altamente flexible y por ende adecuada para condiciones que requieran alta flexibilidad y poleas de diametro pequeño.
- Asegura un desempeño uniforme a lo largo de toda la longitud de la correa a través de toda su vida útil.
- Resistente a alta temperatura, aceite y abrasion.

Correas sin cobertura con bordes cortados y laminadas

- Resistentes al impacto.
- Reduccion de ruido, previenen deslizamiento o patinaje.
- Resistencia a alta temperatura, aceite y abrasion.

Correas sin cobertura con bordes cortados y planas

- Previenen deslizamiento.
- Resistencia a alta temperatura, aceite y abrasion.
- Excelente eficiencia mecanica.

Correas en V con nervaduras multiples

- Diseñadas para proveer excelente flexibilidad, para afrontar requerimientos de poleas de diametro pequeño y dobladuras por contramarcha.
- Ruido reducido.
- Recorrido uniforme.
- Excelente eficiencia mecanica.

Correas de distribucion o sincronizadoras

- Recorrido con quietud.
- No necesitan de lubricacion.
- Engranaje sin deslizamiento .
- Excelente eficiencia mecanica.
